

GROUND SCHOOL

Rebuilding a 2-Stroke R/C Engine

When: **Tuesday, January 22nd, 2008**
7:30 - 9:00 pm

Where: **Harrison Township (Rosso Memorial) Hall**

What: **Rebuilding a 2-Stroke RC Engine.**

How: **Paul Newby will break down and rebuild an engine - LIVE!**

Some of you may remember that Larry Parker "stored" a plane in the woods to the East of the field for a few months this summer. When he recovered it after the fall leaves had dropped, the engine (and most of the rest of the plane) was in pretty poor shape. This is the engine that Paul will try to save.

Our Ground Schools are proving to be entertaining and enjoyable, while at the same time informative and thought provoking. Please join us for the fun and learning as Paul demonstrates on Larry's OS 46FX and talks about the rebuild process. This will include bearing replacement demonstration.

If you have been to previous Ground Schools lead by Paul, you know that he shares all manner of additional engine knowledge as he talks.

So if, like many of us, you are intimidated by the prospect of opening up that engine, join us. I know you will learn and have fun doing it. Even if you "know it all", join us and share your perspective - and have fun too!

As usual, pilots are encouraged to bring new aircraft that they would like to have inspected.
