

RCCD - GROUND SCHOOL

Ever since Paul Newby conducted the Engine Tuning ground school last year, there have been requests to hold another one. It's here!

What:

Glow Engine Tuning - Back by Popular Demand

Date:

Tuesday, May 29nd '07. Rain or shine - Only tornado or severe weather warnings will cause cancellation.

Time:

6:30 pm

Where:

RCCD flying field (Wetzel State Park - on 27 Mile Road just west of Wederman) Because Paul will demonstrate on running engines.

Paul will describe how to get what we all want out of our engines: Easy starting; Reliable idling; Correct mixture (not too lean, not too rich); Reduced chance of dead-sticks.

While the focus will be on tuning the carburetor, Paul covers much more: Engine break-in; Glow plugs; 4-Stroke valve adjustment; etc.

Even if you "know it all", join us and share your perspective.

As usual, pilots are encouraged to bring new aircraft that they would like to have inspected.

Note: General flying will be available at the same time for those who do not want to participate in the Ground School.
