

RCCD - GROUND SCHOOL

What:

Making Molded Parts

Date:

Tuesday, April 24th, '07

Time:

at 7:30 pm

Where:

Rosso Memorial Hall

Darrell Rohbeck will introduce us to the world of molded parts for R/C aircraft. In the ARFs that we assemble, parts such as cowls, cockpit canopies, wheel pants, etc. are often molded. But if you scratch-build a plane you must make your own. Or if you damage the ARF's part, making a replacement may be required.

Darrell will talk about how such parts can be made. He will discuss the various methods and materials used for the molds and the parts. Also he has hinted that he may demonstrate making a part at the ground school.

So, if you have a particular part that you need to make, or are just curious about how parts are made, join us for interesting insights into the methods and materials used to create custom parts. Even if you "know it all", join us and share your perspective.

As usual, pilots are encouraged to bring new aircraft that they would like to have inspected.
